THE necessities of the travelling public, growing out of the rapid multiplication of Rail Roads, and the opening of new routes of travel, by sea as well as by land, will be found to have been met in the present edition of MITCHELL'S NEW TRAVELLER'S GUIDE. The extensive patronage bestowed upon Mitchell's Traveller's Guide, as first published some fifteen years ago, justifies a close adhesion in this to the leading characteristics of that work, and such changes only as time, experience, and the improvements of the last few years, have rendered necessary.

The travelled routes, comprising the chief Rail Road and Steamboat conveyances, have been arranged on a plan deemed better adapted to the wants of the traveller than any heretofore presented, all the connections with the more important routes being shown in a way to prevent confusion, and give general satisfaction.

To illustrate. Starting from Philadelphia, and going West to Pittsburg, the reader will perceive that, after going over the Pennsylvania Rail Road, his attention will be directed to the first Rail Road connection with it, to wit: the Philadelphia and West Chester Rail-Road, and subsequently to the second, third, and all other connections; thus enabling the traveller to make *detours* from a main line of travel, without being compelled to seek information other than

160566

his Guide Book will give him, so far as relates to routes to be travelled over, places to be reached, and distances from place to place. For good reasons, however, we have thought best to exclude two items of information sometimes sought for in Guide Books: we allude to the hours of departure and arrival of public conveyances, and to the cost of fare, as circumstances, not to be foreseen or controlled, are constantly conspiring to render changes in both frequent and necessary. All extraneous matter, and topics of doubtful utility, have been carefully excluded from Mitchell's New Traveller's Guide, so as to keep it within a compass to enable the Publisher to combine the essential qualities of a work of this kind, *cheapness*, *convenience*, and *permanence*.

In their appropriate places will be found full Indexes to the Rail Roads of the United States and the Canadas, and to the general and Special Routes mentioned in the Guide Book. A more complete list of the Rail Roads of the country is not elsewhere to be found.

The accompanying Map exhibits all the principal travelled routes of the country, together with their various connections. It has been carefully compiled from the best authorities, and will be found to be as complete in every particular as it could be made in so condensed a form. The advantages of such a Map, presenting at one view and on the same scale the comparative size of States, length of Rail Roads, Canals, and Rivers, and all the chief features of our country, over a collection of small detached Maps, must be perfectly obvious.

Though the present work is designed chiefly for the use of travellers, it cannot fail to be useful also to others, as a work of reference; while its compact form, and suitable dimensions for the pocket, render it the most convenient publication of the kind now extant.

In addition to a general list of Rail Roads, and Rail Road routes in the United States and Canada, we have appended a special list of Rail Road routes, by reference to which there can be seen, not only the distance between extended points—as, for instance, between Philadelphia and St. Louis—but the Rail Roads constituting the route between the points mentioned, the city or town at which one

Rail Road connects with another, and the distance travelled upon the different Roads constituting the route. In a Guide to the travelled routes of a country like ours, where Rail Roads are counted by hundreds, where so many rival routes are open to the traveller, and where they cross and re-cross each other so frequently, tables of the kind under consideration will be found a desideratum, the value of which it will require only a brief experience to demonstrate.

Franklin and Warren R. R.

This Road is in progress. Commencing at Dayton, it will connect at Urbana with the Columbus, Piqua and Indiana R. R.; at Crestline, with the Ohio and Pennsylvania, and Ohio and Indiana R. R.; passing through the towns of Ashland, Akron, and Franklin, and crossing the Cleveland and Pittsburg R. R. near Ravenna, it will connect with the Venango R. R. at the Pennsylvania State Line, at a point 240 miles from Dayton. On the completion of the Cincinnati and Dayton Air-Line, Franklin and Warren, and Venango Rail Roads, a new route will be opened from Cincinnati to New York, shorter by 60 miles than the one via Columbus, Cleveland, Dunkirk, and from thence by way of New York and Erie R. R.

Venango R. R.

This Road, connecting at the Pennsylvania State Line with the Franklin and Warren R. R., from Dayton to the Pennsylvania State Line, will be an extension of the latter Road to Ridgeway, where it will connect with the Sunbury and Erie R. R.; by means of which, and other Rail Roads connecting with it, large portions of North-western Pennsylvania and North-eastern Ohio will be brought within a few hours' ride of Philadelphia, Baltimore, and New York.
